

Your Destination for Minimally Invasive Brain Surgery (MIBS)

Treatment Roadmap

At the AdventHealth Neuroscience Institute, we understand the concerns that you and your loved ones may have about undergoing any type of treatment for a brain tumor. Our neurosurgical team offers unsurpassed expertise in Central Florida, the Southeast U.S, and beyond. We want you to feel absolutely confident in your choice to seek care with us.

Our patients are treated by neurosurgeons who have long specialized in advanced minimally invasive techniques - such as Gamma Knife® radiosurgery - that are not available anywhere else in the region. These methods can reduce the risks of surgery while requiring minimal or no incisions and lead to quicker recovery times with better results.

Our team has created the following roadmap to help guide you and your loved ones through this journey.

FOR MORE INFORMATION Call your care coordinator at 407-303-7944 or email Denal.Wilson@AdventHealth.com.
