At the AdventHealth Neuroscience Institute, we understand the concerns that you and your loved ones may have about undergoing any type of treatment for a brain tumor. Our neurosurgical team offers unsurpassed expertise in Central Florida, the Southeast U.S., and beyond. We want you to feel absolutely confident in your choice to seek care with us.

Our patients are treated by neurosurgeons who have long specialized in advanced minimally invasive techniques—such as Gamma Knife® radiosurgery—that are not available anywhere else in the region. These methods can reduce the risks of surgery while requiring minimal or no incisions and lead to quicker recovery times with better results.

Our team has created the following roadmap to help guide you and your loved ones through this journey.

1. **Contact your care coordinator, Denal Wilson, at 407-303-7944.**
   Denal is a specially-trained registered nurse who provides expert clinical assistance and support to patients.

2. **Visit one of our specialists.**
   Our care coordinator will make an appointment for you to meet one of our expert physicians who will evaluate you to provide or confirm your diagnosis.

3. **Discuss your treatment options.**
   Depending on your diagnosis, our specialists will talk to you about a variety of innovative, minimally invasive treatment options, tailored to your individual needs.

4. **Make treatment decision.**
   Your care coordinator will set up all necessary appointments prior to and following your procedure, help you prepare and be with you to offer support on the day of your treatment.

5. **Day of procedure.**
   Our MIBS team will ensure you have all the information you need in preparation for your discharge from the hospital. We will continue to be available for you long after discharge to help answer any questions you may have as you recover.

6. **Return home with follow-up care plan.**

FOR MORE INFORMATION: Call your care coordinator at 407-303-7944 or email Denal.Wilson@AdventHealth.com.
