Memory Disorder Treatment for a Better Quality of Life

The **Maturing Minds** program is dedicated to promoting lifelong brain health. It is designed to help those who have memory concerns, are looking for a diagnostic evaluation, or have received a diagnosis and are seeking next steps. Our experienced team can assist with care-plan development, ongoing care for memory loss, and connections to community resources for both the patient and caregiver.

Maintain Your Brain

Nothing is more important than keeping your brain fit and functioning as you age. We provide risk assessments and screening, will identify your risk for developing memory loss or dementia, and help you create a plan for lifelong brain fitness.

For those experiencing memory loss, our specialized team will provide a clear diagnosis, identify treatment options and provide a plan of care. We will also assist with care coordination amongst your clinical team and connect you to necessary community resources. When family caregivers are involved, we provide an important base of support, understanding and training. Our team includes an intake care coordinator, a physician, advanced practice nurses and licensed clinical social workers. Other clinicians are called in to consult as needed, including neuropsychologists, speech pathologists, physical therapists and pharmacists.

In July 2018, AdventHealth was designated as a Memory Disorder Clinic by the state of Florida.

Sponsored by State of Florida, Department of Elder Affairs

To schedule an appointment for screening or diagnosis, call 407-392-9237 or visit AdventHealthNeuroInstitute.com to learn more.
