New System Provides Safer, More Accurate Spine Surgery

Mazor X Stealth is a new, cutting-edge robotic technology designed to enhance the safety and accuracy of minimally invasive spine surgery. AdventHealth is the first in the state of Florida to use this technology. It allows physicians to anticipate the needs and develop a personalized surgical plan for each patient.

Mazor X Stealth Advantages

Since smaller incisions can represent a challenge for surgeons due to the limited view of the patient's anatomy, the Stealth addresses that issue by providing three-dimensional surgical plans and analytics. This gives surgeons comprehensive information and visualization prior to performing surgery that increases accuracy and outcomes.

- Less blood loss
- Less muscle damage
- Less risk of infection
- Faster recovery

About Us

With three world-class spine centers located throughout Central Florida, AdventHealth brings state-of-the-art, compassionate care close to your home. Our team of experts focuses on every aspect of spinal health including neurology, neurosurgery, orthopedic surgery, pain management and physical therapy.
